Coursework Feedback Sheet

MODULE: COM506 Professional Web Services Development

ASSESSMENT 4: Ruby on Rails

NAME: Enda McVey

COMMENTS:

- Application can be installed and run OK
- All existing SOBLOG functionality still working
- Good linking of registration functionality to the main application
- It would be good if new users were automatically logged in after registration
- Excellent incorporation of up-vote/down-vote facility
- It would be useful to see the number of replies alongside an article title
- Overall – good submission. The inclusion of the up-vote/down-vote gem demonstrates clear understanding of the structure of a Ruby on Rails application

Mark: 75%
